

Budget Pack - Harbour Planning Limited

Founder - Lender Readiness Sample | INTERNAL DRAFT - NOT FOR EXTERNAL ISSUE

Funding position

Required additional funding is \$37,338. This single figure covers whichever is larger: the planned funding-target shortfall or the cash-curve deficit.

Metric	Value
Lowest cash point	-\$37,338 in Month 24
Required additional funding	\$37,338
Funding available	\$35,000
Runway	10 months

Cash and downside checks

The base forecast reaches its lowest cash point in Month 24 at -\$37,338. The funding position reflects this cash-curve deficit alongside the planned funding buffer.

Break-even is Not reached and cash-positive timing is Not reached. These should be read alongside the monthly cash curve rather than the annual profit table alone.

The hardest downside test is Combined downside: Not reached cash-positive with \$65,578 of extra cash cover indicated.

Cash and revenue trend

Monthly revenue and cumulative cash across the saved forecast.

Year 2 revenue bridge

Month 13 carries forward the Year 1 exit run-rate, then applies annual revenue growth smoothly month by month.

Bridge point	Revenue	Reader note
Month 12 revenue	\$3,681	Year 1 exit run-rate visible in the monthly forecast.
Year 1 average monthly revenue	\$3,330	Comparison point for averaged or seasonal basis.
Month 13 revenue	\$3,716	Uses Year 1 exit run-rate.
Month 13 change from Month 12	+\$35	1.0% from Month 12.

Funding build-up

Item	Amount	Why it matters
Planned one-off costs	\$3,000	One-off costs entered in the budget, whether for setup, replacement, or growth.
Operating cover	\$31,700	6 months of fixed costs, aligned to lender-style runway checks.
Contingency reserve	\$3,470	10% buffer on planned one-off costs and operating cover for timing and pricing variance.
Recommended funding target	\$38,170	Funding target before comparing against cash already available.
Funding and opening cash available	\$35,000	Saved funding sources plus opening cash balance in the forecast.
Required additional funding	\$37,338	The single funding action figure: the larger of the planned funding-target shortfall and the monthly cash-curve deficit.

Monthly fixed-cost trace

The converted fixed-cost rows total \$5,283 per month; the model base used for funding calculations is \$5,283 per month.

Cost item	Entered	Cadence	Monthly equivalent	Starts	Review note
Founder compensation	\$1,000	Weekly	\$4,333	Month 1	Traces to saved fixed-cost row and converted monthly equivalent.
Client software	\$850	Monthly	\$850	Month 1	Traces to saved fixed-cost row and converted monthly equivalent.
Annual registry fee	\$1,200	Annual	\$100	Month 1	Traces to saved fixed-cost row and converted monthly equivalent.

Later-year cost trace

Cost item	Amount	Timing	Treatment	Confidence
Workshop equipment	\$6,000	Year 2, Month 1 once	Capital asset; depreciated over 3 years	Estimate

Scenario comparison

Scenario	Test	Break-even	Cash positive	Lowest cash	Cash need
Base case	Base	Not reached	Not reached	-\$37,338 in Month 24	\$37,338

Scenario	Test	Break-even	Cash positive	Lowest cash	Cash need
Revenue downside	Sensitivity	Not reached	Not reached	-\$50,411 in Month 24	\$50,411
Cost upside	Sensitivity	Not reached	Not reached	-\$52,854 in Month 24	\$52,854
Combined downside	Sensitivity	Not reached	Not reached	-\$65,578 in Month 24	\$65,578

Annual forecast profile

Revenue, gross profit, fixed costs, and ending cash by year.

Revenue GP Costs Cash

Annual forecast

Year	Revenue	Gross profit	GP %	Fixed costs	NPAT	Ending cash
1	\$39,959	\$31,168	78.0%	\$63,400	-\$32,232	-\$3,103
2	\$46,992	\$37,485	79.8%	\$65,302	-\$29,817	-\$37,338

Profit and cash reconciliation

Opening cash balance: \$5,000. All figures are NZD and GST exclusive.

Year	NPBT	Loss used	Tax	Depn	Capex	Net cash	Closing cash
Year 1	-\$32,232	\$0	\$0	\$0	\$0	-\$8,103	-\$3,103
Year 2	-\$29,817	\$0	\$0	\$2,000	\$6,000	-\$34,235	-\$37,338

Assumption quality

Assumption	Value	Basis	Review note
Annual revenue growth %	12%	Founder/advisor input	Check against pipeline, pricing tests, signed work, or demand evidence.
Revenue basis after year 1	Year 1 exit run-rate	Founder/advisor selection	Use the Year 1 average only for an intentional seasonal or averaged forecast.
Forecast start month	2026-09	Founder/advisor input	Use the real first forecast month so monthly cash and written milestones reconcile.
Opening cash balance	\$5,000	Founder/advisor input	Keep opening cash separate from Month 1 cash movement and funding inflows.
Debtor days	30 days	Founder/advisor input	Match deposit and invoice collection timing; zero means cash is collected in the same month.
Creditor days	30 days	Founder/advisor input	Match supplier-payment timing; zero means direct costs are paid in the same month.
Cost inflation / CPI %	3%	Founder/advisor input	Check against current supplier pricing, rent, wages, software, and CPI context.
Target GP %	70%	Founder/advisor input	Check price, direct delivery cost, capacity, and product or service mix.
Target net profit before tax %	15%	Founder/advisor input	Check whether overheads and owner capacity support the target.
Target net profit after tax %	10%	Founder/advisor input	Check tax treatment and whether retained profit is realistic.
Company tax rate	28%	Reference data	Confirm reference data before relying on after-tax profit.

Year 1 monthly detail

Month	Revenue	Cash collected	Gross profit	Fixed costs	Tax	Net cash flow	Cash
1	\$3,000	\$0	\$2,340	\$5,283	\$0	\$21,717	\$26,717
